Come Home to Style

Your home. It tells a unique story, taste, and personality. We know, because New England has been our home since 1923 and since then we have shared a long heritage of producing quality concrete products that generations of homeowners have selected for their outdoor hardscape projects.

From a welcoming walkway… impressive driveway… relaxing garden patio… outdoor room complete with barbecue and coziest sun-splashed pool deck…sturdy landscape walls…to a backyard paradise to enjoy with family, friends, and neighbors, we have the products to make it possible.

We invite you to browse our catalog and welcome the opportunity to discuss how our wide selection of pavers, steps, walls and natural stone allow you to expand your personal style to the outdoors. Best of all, we can show you how an outdoor area can be created without the need to undertake expensive renovations to your home’s structure and can work with you to select products that fit your budget.

As a 4th generation family-owned business, we take great pride in the products we manufacture and represent. You can feel confident in our knowledge and expertise of producing quality concrete products over the past nine decades go into every product we develop, manufacture, and we back them with our Lifetime Warranty.

From our family to yours, we are pleased to offer you products that welcome you to Come Home to Style.

Outdoor Living
The Possibilities are Endless...

Outdoor living has come a long way from lawn chairs and a basic grill. The trend of your home’s exterior being an extension of its interior has revolutionized hardscapes and the role they play in outdoor living. Ideal has been right there every step of the way innovating the world of outdoor living and making the possibilities as endless as your dreams. Choose from our extensive palette of colors, textures and shapes to create an outdoor living haven that complements your home and suits your style. From a simple and elegant gathering area with a fire pit as its focal point or a full outdoor living area with a kitchen or a dining area and a fire feature to keep you warm in the coldest months, we have the variety and quality you need.

Get the Look…

Create the ultimate outdoor dining and entertaining space with a King of Hearths fireplace and pizza oven. Turn up the heat on these elements and face them with natural stone veneer that is true to New England. For your everyday cooking, pair them with a Twin Eagles grill and kitchen accessories. Add in the finishing touches of our popular MillStone Pavers and a matching veneered fire pit for the most natural look of luxury.
Dramatic Entrances
Welcome them to your home...

Your home is you. It’s your style, taste, and personality. And what better way to welcome family and friends than a stunning driveway, inviting walkway, or steps that transition from the street to your front door? Our styles, finishes and color palette let you create a look that is uniquely you!

Color 4D Technology Pavers
We have taken the next step to offer pavers with advanced performance, colors and longevity – **Color with 4D Technology™** – our newest innovation to our line of select pavers.

Our advanced **4D Technology™** incorporates a unique manufacturing process that integrates proprietary ingredients supplemented with in-line treatments that enrich and enhance the appearance. **Color with 4D Technology™** pavers have deeper, richer colors with superior performance against the elements. They are delivered treated and protected from the factory thus saving the added costs, extra steps and waiting time incurred when a sealer is applied to pavers after an installation is complete. Our **4D Technology™** protects the surface immediately from UV rays, stains and spills and the effects of acid rain – all while providing color fastness that lasts for years to come!

**Color with 4D Technology™** pavers meet and exceed ASTM C936 and CSA 231 standards for interlocking concrete pavers – including freeze-thaw and durability requirements. Unlike sealed or slick pavers, the coefficient of friction is not changed. The surface texture is slip and skid resistant. Escence is no match for the improved surface and matrix of our **4D Technology™**. Chances of it occurring are far less in **Color with 4D Technology™** pavers.

Look for the **Color with 4D Technology™** logo for products made with our **4D Technology™**.

---

**Improved Stain & Acid Resistance**  
**Enhanced Color Tones & Fastness**  
**Advanced Freeze-Thaw Capability**  
**Guard™ Integrated**

See the difference!
ANOVER COLLECOLLECTION™ STONECLEFT

Andover Collection Stone features a rich, natural stone appearance and traditional shapes scaled to complement the trend for larger paving units. The varied sizes offer the ability to create timeless, classic, and elegant pattern designs utilizing our Set-Stone Pattern or custom arrangements of your preference.

**FEATURES**
- Pronounced and sculpted surface
- 2 ¾” thickness for improved flexural strength
- Set-Stone Pattern utilizes every stone in the set with an easy-to-follow pattern that gives the appearance of a random layout — placement, saves time and eliminates waste
- For a more random and dramatic appearance, insert our GrandStone in place of stones within the Set-Stone Pattern or create unique designs
- Can be installed as a traditional or permeable pavement

**GRANDSTONE**
- Individual unit 16 1/2” x 22” 2 3/4” thick 2.52 sf/pc 100.8 sf/cube

This product is susceptible to scuffing during installation and snow removal. Protect the surface when transporting and handling. Use a urethane pad attached to the compactor plate when compacting. When removing snow, the height of snow blowers and plows must be raised or a poly blade used on the plow edge.
ANOVER COLLECTION™ SMOOTH

The clean, classic profile and minimal chamfers of our Andover Collection Smooth are ideal for dramatic, contemporary projects. Red in the same sizes as our Andover Collection Stone you can create the same pattern designs with a sleek, elegant appearance.

FEATURES

- Smooth traditional surface
- 2 ¾" thickness for improved flexural strength
- Set-Stone Pattern utilizes every stone in the set with an easy-to-follow pattern that gives the appearance of a random layout - placement, saves time and eliminates waste
- For a more random and dramatic appearance, insert our GrandStone in place of stones within the Set-Stone Pattern or create unique designs
- Can be installed as a traditional or permeable pavement

This product is susceptible to scuffing during installation and snow removal. Protect the surface when transporting and handling. Use a urethane pad attached to the compactor plate when compacting. When removing snow, the height of snow blowers and plows must be raised or a poly blade used on the plow edge.
ANOVER 5511™

Our Andover 5511 pavers offer a traditional shape scaled to complement the trend of larger paving units. Available in both Smooth and Stone surface, Andover 5511 pavers suit the style of a modern contemporary look or a natural rustic appearance. Now produced utilizing our unique Color with 4-D technology that adds vibrancy and protection to our select line of pavers.

- Andover 5511 Stone: Quad and sculpted surface
- Andover 5511 Smooth: Traditional with minimal chamfered edges

Andover 5511 is also ideal for use as a border course for our Andover Collection. Andover 5511 may be installed as a traditional or as a permeable pavement.

PORTSMOUTH COBBLE™

Comprised as a 4-piece set, Portsmouth Cobble features the charm and look of time-honored paving stones enhanced using Color with 4D Technology. Each shape is subtly contoured and rolled along the edges while the robust spacers molded into the sides adjoin the units to form a stable interlocked pavement. Portsmouth Cobble can be used as a stand-alone paver for customers who desire the look of a classic cobble walkway or driveway, or as the perfect accent to other paver styles when used as decorative banding and border courses.

FEATURES
- Traditional Finish
- 2 3/4" thick
- Pedestrian and vehicular traffic
- Can be installed as a traditional or permeable pavement with approx. 8% void space

YANKEE COBBLE™

The old-world look and feel is unmistakable. Cobblestones are as authentic to New England as the sailing ships that carried them as ballast across the Atlantic. With a wide array of shapes and colors, you’ll have no trouble putting your personal touch on the classic look of natural stone.

FEATURES

- 5 shapes/sizes combine to form over 40 patterns
- Circle Pak allows you to integrate circles into your design
- Traditional Finish with pressed edges and dimpled surface
- Mix-n-Match Packaging - Choice of shape, size and color

FINELINE SERIES™

If a sophisticated, formal appearance suits your style, look no further than our FineLine Series for a beautiful pavement with a refined look. Unlike pavers with a pronounced edge, FineLine is molded with the subtlest of chamfers that fit tightly together with a nearly seamless transition paver to paver. The virtually non-beveled surface accommodates foot traffic in wheelchairs, scooters and roller blades.

FEATURES

- Traditional Finish
- Mix-n-Match Packaging - Choice of shape, size and color

This product is susceptible to scuffing during installation and snow removal. Protect the surface when transporting and handling. Use a urethane pad attached to the compactor plate when compacting. When removing snow, the height of snow blowers and plows must be raised or a poly blade used on the plow edge.

NEWPORT COBBLE™

Take a stroll on classic style with our Newport Cobble. Newport Cobble has the look of natural stone cobble, while bringing a stable and dimensionally consistent “easy-walk” surface.

- Drum-Roll Tumbled Finish with patina and weathered tones
- Patterns include running bond and herringbones

CLASSICO RETRO™

What’s old is new again when it comes to our Classico Retro. We have brought back a classic as an accent paver to highlight banding, soldier and sailor courses. Details make the ordinary elegant!

- Traditional Finish
- Available in Pewter and Graphite

Express Yourself...

Color is the number one reason more architects, professional landscapers, and homeowners choose Ideal. And it’s no wonder! We saturate our pavers top-to-bottom with pure oxide pigments and give you a wide range of eye-catching colors inspired by the deep, rich hues authentic to New England’s heritage.

Although our colors are each beautiful on their own, we encourage you to intermix two or more to create custom blends that reflect your unique style, preference, and color scheme to complement your home.

While we show our popular Boston Colonial Pavers with a few of our most popular Inter-Blend Color combinations, you can use our Inter-Blend Colors with almost any of our paver styles, as noted in picture captions throughout our catalog. Feel creative? Change percentages or combine 3 or more colors! Your possibilities are almost limitless!
Take it one step further! Accent your pavement by incorporating decorative borders and bands using complementary or contrasting colors, surface textures or shapes to boundaries and zones. Create a conversation with mosaics or insets. It is the language of patterns and it speaks your style!
Why Permeable Pavers?

- All the benefits of our standard pavers
  - Pedestrian and vehicular friendly
  - Choice of styles, colors and patterns
  - Firm, stable and slip-resistant
  - Strong and durable
  - Factory-made and ready to install year-round
  - Easy to clean and maintain
- Capable of infiltrating 100% of rainfall
- Contribute to groundwater recharge
- Rainwater harvesting
- Qualify for LEED® Credits
- Mitigate BOD, TSS, pollutant loads and capture "first flush"
- Winter friendly
  - Snow-plow safe
  - Allow snow melt to drain
  - Minimize icing and deicer use
- Cost-Competitive

Concerned About the Environment?

So are we because stormwater has been directly tied to environmental concerns. You see, it picks up and carries pollutants into nearby storm drains that lead directly to streams, lakes and rivers, and ultimately into coastal waters where the contaminants eat aquatic life, swimming, and even our drinking water. To address this, many cities and towns have imposed limits on the area impervious surfaces can cover residential and commercial property.

And when it comes to rainfall, Mother Nature is low water reservoirs, bans imposed on watering lawns, wet yards, basements and beaches closed due to bacteria count can all be linked to stormwater, or in other words, rainfall not seeping directly into the ground as Mother Nature intended. Pavement plays a significant role, and we can help! Our Aqua-Bric, Eco-Stone and Andover Collection and 5511 pavers allow water, even heavy rainfall and snowmelt, to drain through openings in the surface. As it passes through an open-graded stone base, contaminants are naturally filtered out from the water before it infiltrates into the soil below.

Permeable pavers…a built-in solution to managing stormwater pollution with all the style and character of our traditional pavers. Pavers by Ideal…making products that lessen our impact on the world around us and helping build a cleaner and more sustainable future.
AQUA-BRIC®

Aqua-Bric provides classic New England-style with the added benefit of allowing stormwater to drain through and infiltrate into the soil below. It accommodates pedestrians, wheelchairs, and passenger vehicles. The patented drainage openings in the corners allow easier access for sweeping and cleaning to maintain drainage and infiltration.

FEATURES
- Classic rectangular shape
- Patterns include classic 45° and 90° herringbones, running bond and basketweaves
- Traditional Finish (Drum-Roll Tumbled Finish available as “Made-to-Order” item)

DIMENSIONS & COVERAGE

| Aqua-Bric   | 4" x 8" | 2 3/8" thick | 4.5 pcs/sf | 108 sf/cube |

Introducing GRAPHITE, a new color available in Beacon Hill, Quarry, Vineyard, and Graphite blends.
AQUA-BRIC® 8

Aqua-Bric 8 offers the pedestrian-friendly features of Aqua-Bric in a larger and thicker size that is suited for heavy-duty traffic found in parking lots, entrance drives and low-speed roadways and streets. Aqua-Bric 8 is manufactured in three popular color blends in a herringbone layout designed to take advantage of the economy of mechanical installation. The patented drainage openings in the corners allow easier access for sweeping and cleaning to maintain drainage and infiltration.

FEATURES
- Classic rectangular shape
- Traditional Finish
- Manufactured with both shapes included in a single layer

ANDOVER COLLECTION™ & 5511™ PERMEABLE

Our Andover Collection Stone and Smooth and 5511 pavers may be used as a highly-effective permeable interlocking pavement when installed with open-graded aggregate for a stylish solution to stormwater. Please see pages 31-35 for shapes, sizes and colors.

Andover Collection and 5511 Permeable feature an infiltration rate initially greater than 100”/hour.*

*Laboratory results with #9 stone using ASTM C 1781 Test Method for Surface Infiltration Rates of Permeable Pavers.

Accent with Portsmouth Cobble™ or BrookStone™

Portsmouth Cobble
+/- 8% void space
See page 38

BrookStone
Variable void space
See page 39

Andover 5511
7.5% void space

Please see individual product pages for precautions on compaction and snow removal.
ECO-STONE®

This original eco-friendly paver continues to maintain its 1st class status with a look of cobble-setts while capturing and infiltrating rainfall into the ground below through the openings in the surface. It is New England-style and ingenuity at work, making your home and the environment a better place to live. Its 3 1/8” thickness can easily support the weight of cars and trucks making it an excellent choice for driveways, parking lots and low speed roadways.

FEATURES

- Traditional Finish
- Patterns include classic 45° and 90° herringbones, running bond, parquets and basketweaves
- Available in Beacon Hill Blend and Vineyard Blend

TURFSTONE™

Our Turfstone concrete grid paving slab features a “lattice” style surface with apertures that can be planted with grass or filled with stone to infiltrate stormwater. Turfstone accommodates pedestrian and vehicular traffic and is suitable for driveways, parking, access lanes or anywhere “greenspace” pavement is desired. Properly installed, Turfstone is “snow-plow safe”. Turfstone also can be used on slopes and swales for erosion control.

FEATURES

- Proven environmental design
- Fill with stone or soil and grass for a “reinforced” lawn
- High strength capable of supporting heavy vehicle loads

Walls with Style...

CREATE WALLS TO REINVENT YOUR YARD.
Shape your landscape - create retaining, free-standing or seat walls that complement any setting

DESIGN YOUR OUTDOOR SPACE TO SUIT YOUR NEEDS AND STYLE WITH OUR WIDE VARIETY OF NATURAL LOOKING WALLS.

- Level a slope to add more space for play, outdoor living or additional parking
- Transform your yard with terraced walls and stairs that sculpt the landscape
- Accent patios with free-standing seat walls, pillars and pergolas
- Create raised planters blooming with flowers that provide focal points

CREATE AN AREA WITH YOUR OWN PERSONAL SIGNATURE THAT YOU WILL ENJOY FOR DECADES TO COME.

- Strong, dense and durable
- Designed to withstand New England’s winter climate and provide years of lasting beauty and performance
- Environmentally safe - they won’t rot or decay
- Virtually maintenance-free
- Easy to install - Sit on gravel base and stack together. Mortar or concrete is not required
- Affordable - The dry stack feature allows improved productivity and lower costs
- Beautiful - Our styles create serpentine, convex, concave, terraced, freestanding, double-sided and sitting walls that complement the landscape
ROMAN PISA®

Looking to create an antique, weathered feel for your next wall project? The distinctive rich texture of Roman Pisa captures the rustic beauty and charm of hand-crafted stone walls built by the New England skilled craftsmen of yesteryear. Its time-tested appearance makes a Roman Pisa wall fashionable in any landscape setting.

FEATURES

- Full component system creates a variety of ashlar patterns, as well as running bond combinations
- Drum-Roll Tumbled Split Face Finish
- Tongue and groove connection
- Planter height to tall commercial walls

GRAVITYSTONE®

GravityStone combines the simplicity of easy-to-handle dry stack units with the superior earth retention capabilities of crib wall structures. As a result, GravityStone walls can be built as high as 8’ without the use of geogrid, saving time, labor and space.

FEATURES

- Face - Trunk - Anchor components form a “single-cell” assembly 32” deep
- Plug style connection
- Best choice for “cut” walls and sites with little or no room for grid
- Build straight or curved, as well as free-standing, double-sided walls
- Planter height to tall commercial walls

FAT FACE® & FAT FACE 2/3 SCORED

Part of the GravityStone family of wall systems, Fat Face and Fat Face 2/3 Scored provide a strong, durable, and attractive retaining wall solution for a variety of site conditions using a plug style connection.

Fat Face is our original split face unit. Fat Face 2/3 Scored is a three-piece set. Two units have a chamfered score located 2/3 along the length of the split face; the third unit an unscored split face. All three have well-defined chamfers molded into each end providing a distinctive sculptured appearance.

ANCESTRAL™ WALLSTONE

Nothing quite suggests the look of a handsome dry-laid stone wall as our Ancestral WallStone. As a free-standing wall, Ancestral WallStone is a smart choice for outdoor living spaces adding dimension and seating. Use the 3” high and 6” high sets in a simple 1:1 ratio or mix them in combinations for impressive ashlar patterns.

FEATURES

- 3” and 6” high - in 3 lengths (tapered)
- Drum-Roll Tumbled Split Face Finish - double-sided
- Tapered design - straight, curved and serpentine walls
- Free-standing walls - sitting walls - raised planters or low-height retaining walls up to 24” high

OLDE BOSTON™ WALL

Versatile is the word that best describes our Olde Boston Wall. The modular dimensions of the single unit allow placement in four different orientations and the ability to create a variety of patterns, including running bonds, random and ashlars for design flexibility. It can be used for a wide variety of applications such as garden walls, seat walls, planter walls, barbecue islands, pillars and columns.

Olde Boston Wall also can be split to create accent banding within the wall.

FEATURES

- Drum-Roll Tumbled Finish
- Pillars - free-standing walls - raised planters or low-height retaining walls up to 24" high

DIMENSIONS & COVERAGE

| Olde Boston Wall | 4"h x 12"w x 8"d | 3.1 pcs/sf | 28 lb | 34.8 sf/cube |

CASTSTONE™ ROCKFACE COPING

Our CastStone coping units capture the features and characteristics of natural stone with their detailed rockface edges molded along the face and end with the consistency, value and of dense, durable cast concrete. The depth and length of our 4’ long coping unit make it the right size for a deep, comfortable bench seat. The 24” long coping is a best choice for seat walls and topping free-standing, double sided walls.

FEATURES

- Ideally suited as coping for our Ancestral or Olde Boston seat walls
- Natural look rockface edge
- Available in Slate Grey and Graphite

Steps & Elevations
Step out with Style...

TAKE YOUR OUTDOOR DESIGN PROJECT TO THE NEXT LEVEL

It’s possible with Steps & Stairs by Ideal.

Whether your steps lead to a raised patio, an inviting terrace, a lush garden, or even back to the comforts of home, our steps and stairs create form and function when shaping your landscape. Choose from one of our many styles to make the transition throughout the various levels of your outdoor spaces well-conceived, graceful and easy to traverse. Their durability ensures a lifetime of beauty and function.

Pleasing styles, sizes, and colors to match your wall designs and personal style.

- CastStone Chelmsford and Rockport Steps
- Natural stone including granite in a variety of sizes and colors
- Manufactured concrete wall block steps

CHELMSFORD™ STEP

Our Chelmsford Step is a durable precast concrete unit molded with the 2000 year-old contours found in natural stone steps. Chelmsford Step is available with a choice of two faces in a single unit. One side reproduces the traditional style that stone masons achieved by using “feathers and wedges” to split the face, while the opposite face features a more contemporary rock-face. Available in Slate Grey.

FEATURES

- Easily build steps that beautifully integrate with our Roman Pisa, Stonewall and GravityStone walls

DIMENSIONS & COVERAGE

| Chelmsford Step | 48”l x 15”d x 7” h | 475 lb | 8 pcs/pallet |

Top Left: Chelmsford Steps • Roman Pisa Wall & Coping - Vineyard Blend
Right: Chelmsford Steps • Ancestral WallStone - Vineyard Blend • MillStone - Vineyard Blend/Quarry Blend
ROCKPORT™ STEPS

The classic look of weathered-hewn stone can be found in our Rockport Step Collection. Available in several sizes and shapes, each step is cast in molds that carefully replicate the textures, colors and detail of natural stone. Features a 7” rise. Each offers consistent size, height and texture, saving time when selecting and installing. Available in Fieldstone Blend.

NATURAL STONE STEPS & Treads

Mother Nature has given New England a look all its own. Why not make the finishing touches to your hardscape project just as unique? Incorporating natural stone full steps or capping your step risers with natural stone treads is the perfect way to add New England warmth and character to any elevation change. Want the best Mother Nature has to offer? We have a variety of styles, sizes and finishes including granite, bluestone and limestone, and we also offer custom sizes as needed.

Elements with Style
Elements with Style

TAKE YOUR PROJECT FROM “GREAT” TO “WOW”
It’s possible with Elements with Style.

Even though our walls and pavers look beautiful on their own, it’s the special touches that speak to your style and taste. Inside your home, it is the furnishings and accessories you have carefully selected to adorn your rooms. We have the products you need to take your fashion sense outdoors! We call them “Elements.”

Create zones, markers, edgers and mosaics in your paver pattern with accent pavers. Incorporate pillars and seat walls to provide classic and form to your hardscape. A cozy pit is always a welcoming space for family, friends, and neighbors to enjoy. Become the maestro of entertainment with a King of Hearths place and pizza oven, or if cooking is your thing, explore your creative style with a full outdoor kitchen. Budget conscious? Then our easy-to-install BBQ surround with your existing grill is sure to make any chef proud!

KING OF HEARTHS

Few things are as enjoyable as spending time with family and friends in your own backyard. Our line of King of Hearths outdoor fireplaces and pizza oven make it easier than ever before to add to that experience with the warmth and glow of a crackling fire or with the savory taste of delicious pizza or roasted meat with flavorful vegetables cooked in a wood-fired oven.

King of Hearths pre-cast fireplaces, pizza oven and side boxes are easy to handle and set-up. The fireplaces are lined with fire brick and come pre-assembled, as do the pizza oven and side boxes. The units are ready to be placed, stacked and veneered with natural stone, brick or our Olde Boston™ WallStone. Whether you are building a new outdoor living space or adding to an existing one, you can feel confident knowing King of Hearths products have been engineered with high strength concrete made to stand the test of time and rigors of New England’s weather!

KING ARTHUR FIREPLACE

King Arthur 46” Outdoor Fireplace

- Simple 3-piece mortarless design makes set up quick and easy
- Large fire box opening
- Fire box pre-lined with fire brick
- Built-in fork pockets facilitate lifting into place
- Sets on a 6” thick concrete slab 50” w x 40”d
- Chimney sized to accept 13” x 13” spark arrestor (sold separately)

- Cast Iron Log Grate included
- Weight: 2100 lbs
- Angle iron length: 48”
- Stone veneer: 63 sq
- Stone veneer corners: 36 lin

Note: Fireplace must be veneered.
GUINEVERE FIREPLACE

Guinevere 38" Outdoor Fireplace

- Simple 2-piece mortarless design makes set up quick and easy
- Fire box pre-lined with firebrick
- Built-in fork pockets facilitate lifting into place
- Sets on a 6" thick concrete slab 42" w x 32"d
- Chimney sized to accept 13" x 13" spark arrestor (sold separately)

- Cast Iron Log Grate included
- Weight: 1700 lbs
- Angle iron length: 32"
- Stone veneer: 46 sq
- Stone veneer corners: 28 lin

Note: Fireplace must be veneered.

LANCELOT PIZZA OVEN

Lancelot Pizza Oven

- Great for stone pizzas and more
- Protective firebrick pre-installed
- Chimney sized to accept 9" x 9" spark arrestor (sold separately)
- Ready to be finished with natural stone veneer

This Page Bottom Left: New England Blend Mosaic Veneer • Twin Eagles Grills, Power Burner, Refrigerator, Double Storage Drawer, Double Access Doors, Trash Drawer • MillStone - Vineyard Blend Pattern 6
Top Right: Twin Eagles Tappanyaki & Double Side Burner
Twin Eagles is our top-of-the-line grill and accessories line. Twin Eagles uses premium-grade 300 series stainless steel, precisely cut with advanced lasers and constructed with heli-arc welding technology for the intense strength and durability essential for outdoor use. You’ll see and feel their commitment to quality in every interaction with their superbly engineered and crafted equipment – responsive, intuitive, easy to use. And your family and friends will taste it in every delicious bite.

FEATURES

- Built-in premium grills with exceptional style, quality and performance
- Unique designs with contoured angles, seamless welds and hi-polished accents
- LED-illuminated knobs and interior lighted hood for nighttime cooking
- Optional infrared rear rotisserie burner and rotisserie set
- Refrigerators, warming drawers, griddles, sinks, coolers, bar and other accessories

Delta Heat products are engineered, designed and manufactured by the industry leading premium grill and outdoor kitchen equipment experts – Twin Eagles, Inc. We understand that the right features, exceptional performance and longevity are important to you. Rest assured that these attributes are at the forefront of all Delta Heat products.
KITCHEN ISLANDS & BARBECUE SURROUNDS

Outdoor kitchens and barbecue are one of the most popular requests for extending living space outside the home. From a simple grill surround to a complete kitchen featuring our Twin Eagles and Delta Heat grills, rotisseries, burners, refrigerators, and accessories, we have the products to create a gorgeous and highly functional outdoor dining experience. Enhance the space with a Primo Ceramic Grill, a perfect mainstay for any outdoor kitchen.

Choose from our variety of Natural Stone Veneers cut in ashlar, ledgestone, mosaic, squares and rectangles, and rounds offered in eight beautiful color options, or select one of our concrete wall styles, such as Olde Boston Wall, Ancestral WallStone, or Roman Pisa to create a custom look that will enhance your home. Our elegant Granite, Bluestone or CastStone counters are the perfect choice to top off your grill island.

PILLARS & PILLAR CAPS

Pillars add a desired element to landscape design, providing structure and form to the landscape and property lines. Whether they are used to frame a stately entry or as an outdoor space, pillars can be a perfect finishing touch for your outdoor living space. Pillars can be topped with our CastStone Chelmsford™ or CastStone Carlisle™ Pillar Caps or with natural stone such as Bluestone, Granite or Limestone, and you can add lighting or complete and customize the look. Pillars can be stand-alone or may be integrated into one of our free-standing double-sided walls. Choose from a variety of wall styles to create your pillars, including Roman Pisa, Ancestral WallStone, and Olde Boston Wall, or utilize natural stone such as stackstone, or one of our many stone veneer selections.

ATLANTIC® COLORFALLS™

Incorporate the beauty of water and light into our popular landscape wall styles with Atlantic Water Garden’s Colorfalls, the lighted weir designed for water features. Colorfalls will add simple, elegant beauty to your outdoor space, day and night.

FEATURES
- Available in clear, colored or color-changing LED light bars
- Light bars are available in three widths - 12", 24" and 36"
- Kits include basin, pump, and built-in plumbing recesses
- Easily incorporated into our popular segmental walls or natural stone walls with minimal cutting

LANDSCAPE LIGHTING

There is no better way to highlight the beauty of hardscape features than with landscape lighting! Whether you are looking to light up the night, or simply add a few accents to your walls or walkways, landscape lighting can provide the perfect touch to any outdoor space at night.

From simple under the coping lights, to full spotlights and everything in between, the possibilities are endless. Available in a variety of and types, and in both white and color changing light, landscape LED lighting is an easy to install and an inexpensive way to take your project to the next level, allowing you to enjoy the space both day and night.
Natural Stone
**Mother Nature’s Best**

The character and beauty of “Natural Stone by Ideal” tastefully integrates with the colors, textures and tones of our concrete pavers and walls creating the perfect collaboration of hardscape materials.

Choose from New England favorites such as granite, bluestone, slate or fieldstone. **Interior or exterior, natural stone is well suited for both residential and commercial projects—from fireplaces and chimneys, to landscape walls and outdoor rooms, veneer, patios, steps and stairs. So many choices, so many stunning uses!**

Ideal’s natural stone veneer is the perfect upgrade for your home. Whether you want to make a statement by facing the front of your home or upgrade the appearance of existing steps, we have the answers.

We strongly recommend using an experienced craftsman to achieve the looks shown on these pages. The stones have been professionally shaped and trimmed to fit tightly together. This often requires more material, so be sure to take this into consideration when placing your order.

GRANITE & BLUESTONE

Granite is one of New England’s signature natural stones and has been used for hundreds of years in residential, commercial, and municipal projects for its beauty and durability. From cobbles and edging to stairs, posts, coping, and slabs, we offer a complete line of products to suit any project.

GRANITE COBBLES

All colors:
- 4 x 4 x 4 in. – Cube
- 5 x 5 x 9 in. – Regular
- 7 x 4 x 10 in. – Jumbo

Grey only:
- 4 x 4 x 8 in. – Landscape
- 6 x 3 x 12 in. – Footlong
- 6 x 3 x 6 in. – Half Footlong

Bluestone and Granite products are all available in treads, steps, pattern stock, slabs, and custom sizes.

LIMESTONE

Limestone available in 2” tread stock in multiple lengths.
BULK & PALLETIZED STONE

Step out of the box and explore our bulk and palletized stone. We offer irregular stone, risers, and palletized wallstone in addition to timeless New England Round Stone.
MEETING YOUR EXPECTATIONS

As you consider a new walkway, patio, driveway, landscape wall, or other hardscape project, you have lots of choices as to which product and color to select. It’s an important decision. And all, it’s an investment that should meet your expectations for years to come. So we thought it would be helpful and responsible to pass along some sound advice.

What should be realistic expectations for your pavement or wall? Our pavers, walls and garden products are commercial grade – unlike similar products found in large home improvement stores. Ours are factory made and delivered in ready-to-use condition that meets the highest industry standards. This means they are strong, dense and durable. Properly installed, your pavement and landscape walls will provide years of lasting beauty and dependable performance!

Ideal has made and sold hundreds of millions of paving stones and countless landscape walls since 1975. In fact, no other manufacturer has sold more in New England than Ideal. Our name has become synonymous with quality, service and reliability. While some manufacturers would lead you to believe their pavers and walls will never change in appearance, we believe in a more realistic position. And all, over time Mother Nature takes her toll on everything! We keep this in mind in our design. So while normal wear and tear and exposure to the elements are part of the natural aging process, you can expect the color tones, shape and pattern of Ideal products to remain for a lifetime!

For additional information, we recommend ICPI Peak Performance for Concrete Pavers, a maintenance guide for consumers, published by the Interlocking Concrete Pavement Institute. It contains a wealth of information that will help keep your pavement in tip top shape and can be found on our website.

COLORS: OUR BEAUTY IS MORE THAN SKIN DEEP

Our pavers and walls are saturated with rich colors…top-to-bottom…not just at the surface. Because color is throughout, chips, dings and scratches, which are inevitable, quickly “blend-in” and are hardly discernible. Don’t be fooled by gimmicks that are nothing more than a thin veneer. And all, our products are a lifetime investment.

OUR PROCESS: IT’S ONLY NATURAL

Our pavers and walls are made with natural ingredients. Look closely and you will a unique character to each and every paver and wall and, in fact, no two look exactly alike. You will see subtle variations in color and texture for a truly natural appearance. Our color blends contain two or more pigments to achieve a random variegation and even our solid colors have nuances in tone and hue. Please remember that, unlike a painted surface, concrete products have inherent texture and shade variations. The product you receive may vary in color and texture from samples. Cubes of product may contain a percentage of colors and textures than shown in this catalog. As you would with dye lots in fabric and carpet, purchase your pavers and walls all at one time. When installing, select product randomly from several cubes for uniform color distribution.

TUMBLED OR TRADITIONAL: WE COME CLOSE TO FOOLING MOTHER NATURE

We manufacture our pavers and walls with a choice of choose pavers with a traditional surface or ones with the look and feel found in vintage pavements. From our wall collection select styles with a rugged split face to our tumbled that resembles handcr walls of yesteryear. To faithfully reproduce the color, texture and durability of vintage stone, we use an innovative technology that enables us to impart an “old world” charm using a unique factory process that antiques the surface, while preserving the inherent structural stability. We call it Genuine Drum-Roll Tumbled, and although it takes more time and effort to fool the eye, it far surpasses the automatic processes used by other manufacturers, it creates pavers and wallstones that truly capture the nostalgia of time-honored colors and textures of natural materials.

A PICTURE IS WORTH A THOUSAND WORDS

How true the saying is that a picture conveys an image that words can never describe. That is why we use pictures generously throughout this catalog to depict our products. And yet many factors one’s perception of images and colors, and they may appear from one photo to the next. Angle of light and time of day greatly fact perception, and colors printed in ink cannot exactly match the actual concrete product colors. The point we are trying to make is the images shown in this catalog are only the step in selecting colors. Once you have narrowed your choices, obtain actual samples from your dealer or contractor. View them in the setting where they will be installed before making your selection.
**EFFLORESCENCE**

A white haze known as efflorescence sometimes appears on the surface of concrete and masonry products. Technically known as calcium hydroxide, it can come from a number of sources and appears as a white powdery substance when carried to the surface by moisture. It may appear randomly or in certain areas and is more pronounced on darker colors. The good news is that efflorescence does not affect longevity or structural performance. Although unsightly when it first appears, in many cases it is scoured during installation, or if desired, it can be removed using specialty cleaners. Otherwise, it will typically lessen, or dissipate, over time with rain, snow and wear.

Because efflorescence can be a natural by-product of cement hydration, its presence is not indicative of a defective or deficient product. We, as do all other manufacturers, disclaim it from our warranty.

**LIFETIME WARRANTY**

We back our pavers and walls with our name and a Lifetime Warranty on the structural integrity of our products used in residential applications. Product that proves to be defective by failing to meet ASTM industry standards will be replaced without cost. We will do our best, but color, texture and finish of replacement product may not match the original, and cost of labor is not included. Proof of purchase is required. All warranty claims must be made prior to removal or disposal of product in question and be approved in writing. Please note, color variance and efflorescence do not constitute an actionable claim against our warranty. Other exclusions apply. Please visit www.PaversbyIdeal.com/warranty for complete details.

**SNOW, ICE AND DEICERS**

Our pavers and walls are more than beautiful. They have the durability to withstand New England’s harsh winters and, when properly installed, snow removal is no problem...either by shovel, snow blower or a plow using a rubber or poly plastic cutting edge.

Our pavers have a surface that is slip and skid resistant even when wet. Ice, on the other hand, can be slippery, particularly as it melts, and common sense should be used to prevent slips and falls. We recommend sand for traction. It can be applied liberally and as needed. Sand provides a visual reference of its presence and can be felt underfoot as a tangible medium aiding foot traffic. Clean, untreated sand has no corrosive effects on steel, metal, clay brick, cast-in-place concrete or concrete pavers and it can be swept into the paver joints or removed by conventional sweeping or vacuuming.

Concrete pavers are exceptionally robust in resisting the effects of deicing chemicals. We have manufactured pavers that have been exposed to salts for over 40 years! Nevertheless, chlorides can be harmful to concrete, steel and other building materials depending on the type, concentration and frequency of application. If using a deicer, we recommend a NaCl sodium chloride. We strongly advise against the use of other types, particularly magnesium and potassium chloride, and products that contain a blend of these chemicals.

**READ ME**

Throughout our catalog, this icon is displayed with a variety of products. It is our way of pointing out essential instructions unique to the particular paver to assure the best outcome when transporting, handling, installing and removing snow from the pavers.

While all pavements experience wear and tear over time, a little care and attention go a long way to avoid marring the surface early on. Protect the faces from abrasions and scratches that occur when units are slid across the top of the layer below. Do not drop them. Most important, stipulate that a urethane pad be attached to the plate of the compactor when it is run over the pavers to avoid scratching the surface – particularly for styles with embossed and cleft faces. Do not overlook snow removal. Take precautions that the height of snow blowers and plow blades are adjusted or a poly blade is used on plow edge. Surface scratches are not covered by our warranty. If unsure what should be done, attach an tag attached to every cube when the product is delivered provide the information you need to know.

**VISIT OUR WEBSITE TO LEARN MORE**

We invite you to visit our website PaversbyIdeal.com. It is a wealth of information including:

- Where to buy
- Photo gallery
- Easy to follow how-to instructions
- Product literature
- Paver and Wall Comparison Charts
- Patterns
- Wall Guide to selecting the best style
- Technical specifications
- Contractor Paver and Wall Guides
- Cross sections and drawings
- Case studies
- Cleaning and sealing guide
- Much, much more

Ideal proudly supports ICPI, NECMA, and NHExpo by taking an active leadership role in developing standards and best practices that serve to advance the industry for its members, community, and constituency.
YOUR COMPLETE RADIANT HEAT SOLUTION

In New England, snow and ice are a way of life during the cold winter months. Snowmelt systems are an easy, convenient, and inexpensive way to keep your driveway, walkway and patio free of snow and avoid slips and falls due to ice. Electric heating systems are popular because of their ease of installation and surprisingly reasonable cost to operate. Unlike hydronic, or liquid heat systems, they do not require a dedicated boiler system. Heat cables embedded in the pavement run off of your existing power supply.

A ProLine Radiant Heat System is fully automated and maintenance free. Their professional grade heat cables are UL listed and backed with an industry leading 10-year warranty. Wrapped with a durable insulated coating, the cables provide uniform heat along their entire length and are active with melting snow even at the furthest distance. When snow falls, a sensor device activates power to the insulated cables. The heated pavement melts snow upon contact and prevents ice from forming on the surface. No more going out in the cold to shovel, snow blow or plow!

If dealing with snow and ice is something you want to cross off your list, please contact us. We can custom design a system to meet your needs and budget by calculating the lay-out of the cables in the area where you want snow to melt and provide you with an estimate of the cost to run it based on an annual snowfall for your location. Once you give us the go-ahead, we will work with your contractor to finalize the design with a CAD diagram showing placement of mats, snow sensor and power source. A qualified electrician completes the system by connecting the power.

ProLine snow melt systems add value to your home and eliminate the use of harmful salts and snowmelt chemicals that can damage your pavement and bordering landscape. Have an existing driveway or walkway? We can help there too!

So, when snow is in the forecast, let it snow, let it snow, let it snow! You will be warm and cozy inside your home and have peace of mind, knowing that your walks and driveway will be automatically cleared, regardless of the weather conditions.
DESIGN ASSISTANCE

A beautiful landscape begins with a great design. When planning a large-scale hardscape project with multiple patios, terraced walls, seat walls, fire features, and outdoor kitchens, it can be difficult to envision how they will coordinate with one another. Whether it’s a new or an existing property, we can work with you to develop a plan to create a visually beautiful and functional space that enhances your property and outdoor living experience for you and your family.

For this type of project, we now offer in-house 3-D Design Assistance to bring your dream project to life. Our design team will take the time to learn your preferences and lifestyle and work with you to create detailed renderings so realistic you will swear it was already built!
PROFESSIONALLY INSTALLED OR DO-IT-YOURSELF?
WE CAN HELP!

Deciding_ often depends on the size and scope of the work, as well as how ambitious you are. While small walks may be a weekend project, others will take far longer. Your authorized Pavers by Ideal dealer can suggest contractors suited for your project. Be sure to check references, visit projects they have installed, make sure they have insurance and... get it in writing!!

Visit our website www.PaversbyIdeal.com for more helpful tips on hiring a contractor. For the ambitious DIY-er we have easy-to-follow instructions that will guide you step-by-step for beautiful results. Ask your Ideal Authorized Dealer for one of our paver or wall installation booklets or download them from our website.

PAVER INSTALLATION

- Excavate and thoroughly compact area to be paved.
- Install and compact base in 2-4" layers (1 1/2" processed gravel or 3/4 crusher run).
  - Typically 4-6" deep for walkways and patios
  - Typically 6-8" deep for pool decks (see your Authorized Dealer for more information)
  - Typically 8-12" deep for driveways
- Install edge restraints directly on the base and secure with 10" steel spikes.
- Spread coarse concrete sand and screed to a uniform depth of 1" thick.
- Starting from a 90º corner, place pavers in desired pattern and cut where necessary to use 2 3/8" thick pavers for most residential applications and 3 1/8" thick pavers for commercial vehicles.
- Compact the pavers into the sand bed with a plate compactor or rubber mallet.
- Sweep dry sand into joints and compact. Repeat procedure until the joints are full.

Note: Poor draining soils, such as clay, may require additional excavation and base material and the use of a woven geotextile fabric.

PERMEABLE PAVER INSTALLATION

The installation method is similar to our regular pavers with a few important references.
- While processed gravel can be used as a base, we recommend open-graded stone, preferably 1 1/2" open-graded crushed stone, for peak performance.
- Deeper excavation is required.
  - Typically at least 6-8" for walkways and patios
  - Typically a minimum of 8-12" for driveways
- The setting bed increases to 2".
- 3/8" crushed stone is used for the setting bed.
- 1/4" chip stone is used to the joints and openings.
- Edge restraint requires the use of the Berm Method, CurbStone Edging or SEK PermEdge.
Retaining walls under 4' high are usually built as a gravity wall, where the weight, depth and set-back of the units provide resistance.

- Excavate a trench about 12” deep by 24” wide for the length of the wall. Compact the subgrade soil thoroughly and line excavated area with landscape fabric.
- Fill trench with 1 1/2” processed gravel or 3/4” crusher run base material and compact in 2-3” layers until base is 6” thick.
- Place and levitate first course of wall units on the base.
- Place perforated pipe behind the wall for drainage and backfill with 3/4” crushed stone.
- Place successive courses by stacking wall units on top of the row below, staggering joints as you go.
- Depending on the style wall, units will connect and automatically step back with pins or a tongue and groove.
- Backfill with 3/4” crushed stone behind each course and in each core if applicable and compact.
- Finish the wall by attaching coping units with Ideal’s SRW adhesive.

SPECIAL CONSIDERATIONS
Walls 4’ and higher, terraced walls, sites with weak or wet soils, slopes and other loading conditions, such as a driveway above the wall, require special consideration. These are reinforced walls that are built using other construction techniques, including the use of geogrid and we recommend using a soils engineer and a professional contractor for these situations.

GravityStone® retaining walls, pillars, and free-standing walls require different construction methods. Please see our wall guides available at www.PaversbyIdeal.com for more information on installation.

Play it safe and contact your Pavers by Ideal® Authorized Dealer for more information regarding the above special considerations.
QUALITY • SERVICE • RELIABILITY

The Ideal Way - Most likely you know us as Pavers by Ideal, a registered trademark of Ideal Concrete Block Company, the name we market our line of hardscape products under. As a 4th generation family-owned business, we pride ourselves in honoring the ideal tradition of quality and service which has been proudly passed along through four generations of the Burgoyne family.

Our commitment to quality – We take great pride in our concrete products available. They are manufactured according to strict industry specifications and are then benchmarked by our own exacting internal standards. Our commitment to excellence ensures superb quality, exceptional strength, lasting durability, and consistent, rich color.

Ideal…a name you can rely on! - We have made New England our home for over 95 years. We are one of only 5 companies in the United States to manufacture concrete pavers. We bring you over 40 years of experience and have sold millions of square feet of pavers and countless walls throughout New England! You can feel it. Our products are backed by a Lifetime Warranty and our name. After all, you might say we are time tested...since 1923.

We are here for you! - Ideal values our relationship with our customers. We have partnered with an extensive network of Authorized Dealers throughout New England who share our core values to provide responsive customer service and expertise that meets your needs.

Thank you,
The Burgoyne Family
